T – IZE NOV. 1998 Printed in Japan

1. SAFETY INFORMATION

This service manual is intended for qualified service technicians ; it is not meant for the casual do-it-yourselfer. Qualified technicians have the necessary test equipment and tools, and have been trained to properly and safely repair complex products such as those covered by this manual.
Improperly performed repairs can adversely affect the safety and reliability of the product and may void the warranty. If you are not qualified to perform the repair of this product properly and safely, you should not risk trying to do so and refer the repair to a qualified service technician.

WARNING
This product contains lead in solder and certain electrical parts contain chemicals which are known to the state of California to cause cancer, birth defects or other reproductive harm.

Health & Safety Code Section 25249.6 – Proposition 65

NOTICE
(FOR CANADIAN MODEL ONLY)
Fuse symbols (fast operating fuse) and/or (slow operating fuse) on PCB indicate that replacement parts must be of identical designation.

REMARQUE
(POUR MODÈLE CANADIEN SEULEMENT)
Les symboles de fusible (fusible de type rapide) et/ou (fusible de type lent) sur CCI indiquent que les pièces de remplacement doivent avoir la même désignation.

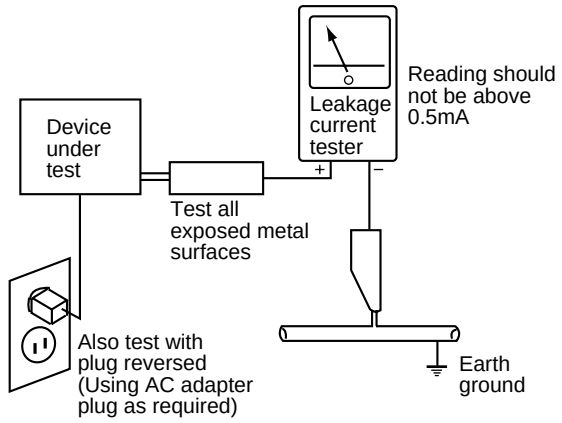
(FOR USA MODEL ONLY)

1. SAFETY PRECAUTIONS

The following check should be performed for the continued protection of the customer and service technician.

LEAKAGE CURRENT CHECK

Measure leakage current to a known earth ground (water pipe, conduit, etc.) by connecting a leakage current tester such as Simpson Model 229-2 or equivalent between the earth ground and all exposed metal parts of the appliance (input/output terminals, screwheads, metal overlays, control shaft, etc.). Plug the AC line cord of the appliance directly into a 120V AC 60Hz outlet and turn the AC power switch on. Any current measured must not exceed 0.5mA.



AC Leakage Test

ANY MEASUREMENTS NOT WITHIN THE LIMITS OUTLINED ABOVE ARE INDICATIVE OF A POTENTIAL SHOCK HAZARD AND MUST BE CORRECTED BEFORE RETURNING THE APPLIANCE TO THE CUSTOMER.

2. PRODUCT SAFETY NOTICE

Many electrical and mechanical parts in the appliance have special safety related characteristics. These are often not evident from visual inspection nor the protection afforded by them necessarily can be obtained by using replacement components rated for voltage, wattage, etc. Replacement parts which have these special safety characteristics are identified in this Service Manual.

Electrical components having such features are identified by marking with a ⚠ on the schematics and on the parts list in this Service Manual.

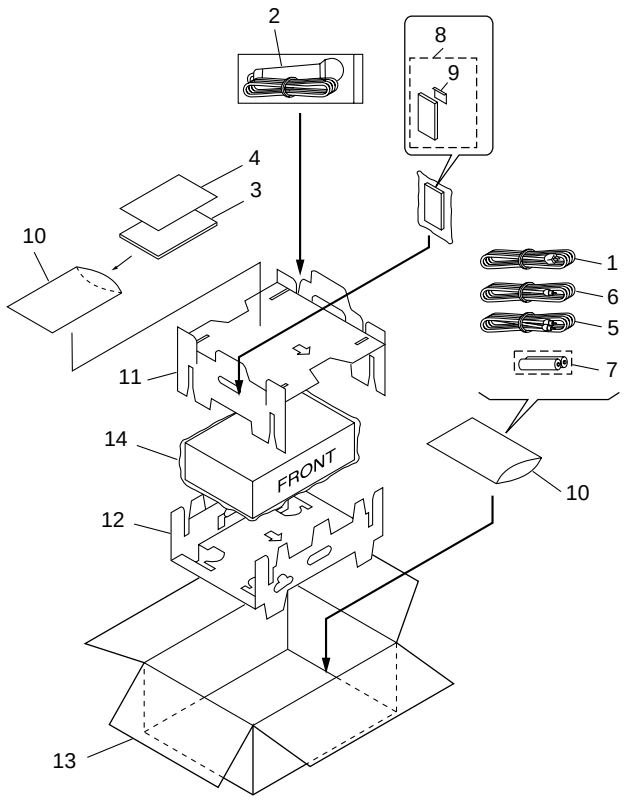
The use of a substitute replacement component which does not have the same safety characteristics as the PIONEER recommended replacement one, shown in the parts list in this Service Manual, may create shock, fire, or other hazards.

Product Safety is continuously under review and new instructions are issued from time to time. For the latest information, always consult the current PIONEER Service Manual. A subscription to, or additional copies of, PIONEER Service Manual may be obtained at a nominal charge from PIONEER.

2. EXPLODED VIEWS AND PARTS LIST

NOTES: ● *Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.*
● *The ⚠ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.*
● *Screws adjacent to ▼ mark on the product are used for disassembly.*

2.1 PACKING



● PACKING PARTS LIST

Mark	No.	Description	Part No.

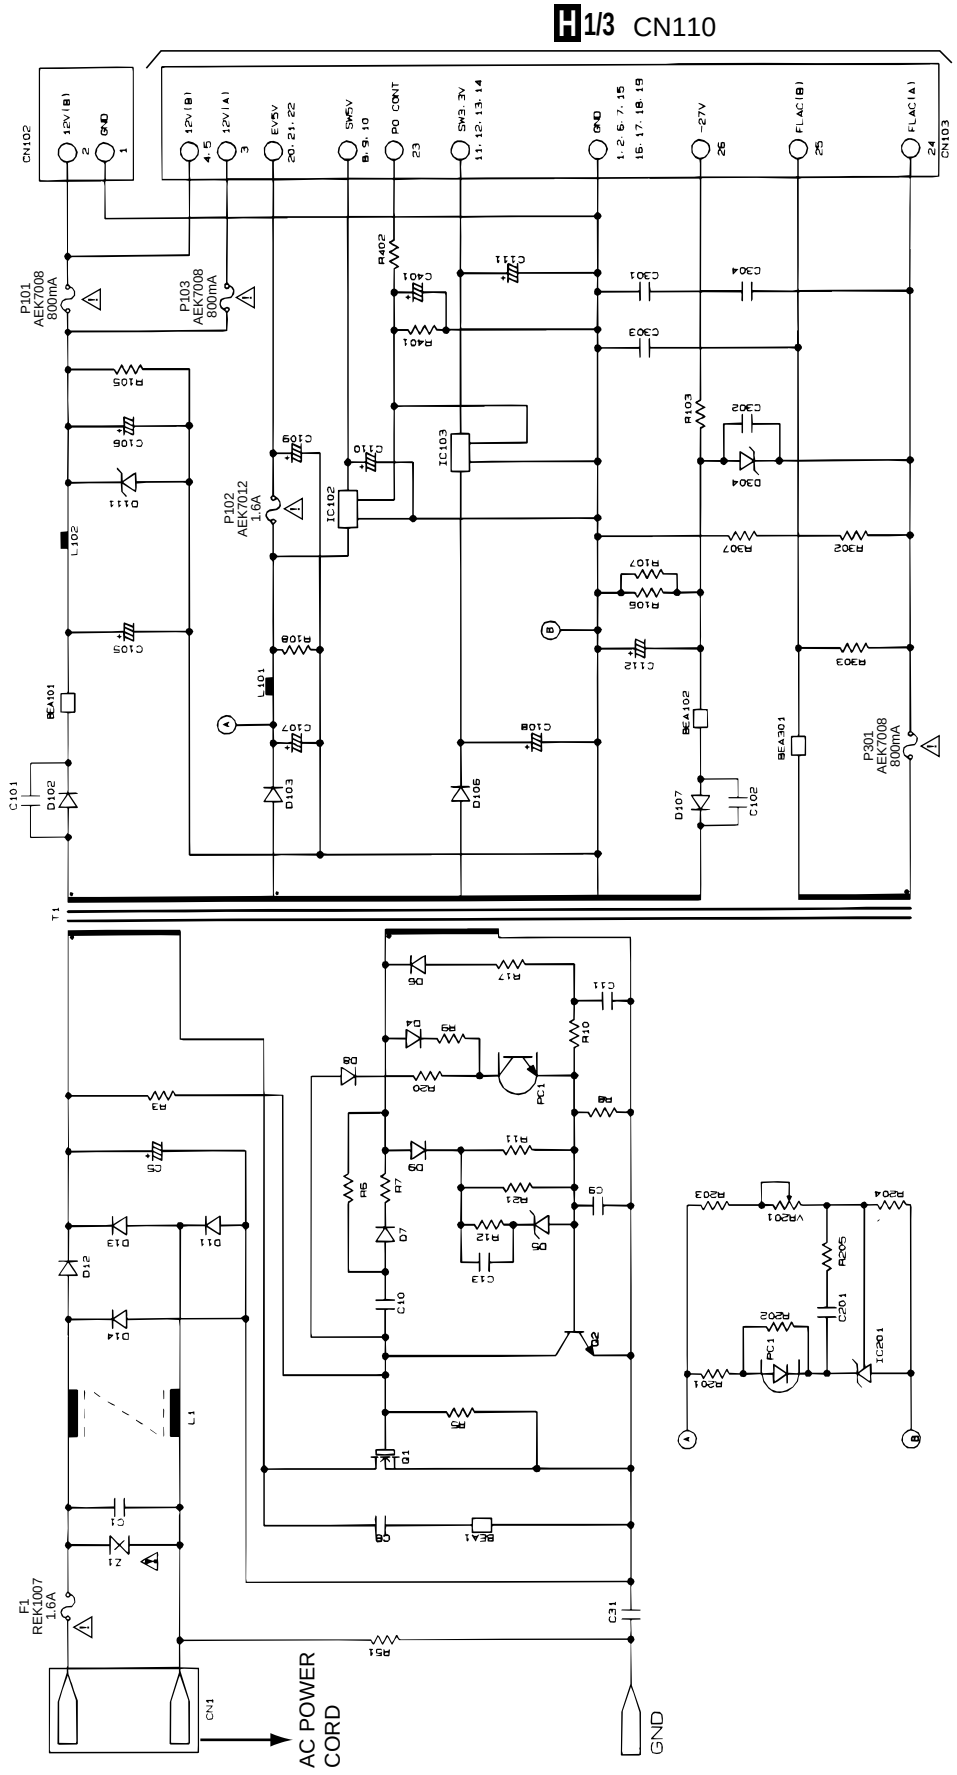
3.8 POWER SUPPLY ASSY



CAUTION : FOR CONTINUED PROTECTION AGAINST RISK OF FIRE, REPLACE ONLY WITH SAME TYPE NO. 491.800 MFD. BY LITTELFUSE INC. FOR P101, P103, P301 AND NO. 491 01.6 MFD. BY LITTELFUSE INC. FOR P102.

• NOTE FOR FUSE REPLACEMENT

CAUTION - FOR CONTINUED PROTECTION AGAINST RISK OF FIRE. REPLACE WITH SAME TYPE AND RATINGS ONLY.

《 NOTE OF SPARE PARTS IN POWER SUPPLY (SYPS) ASSY 》

- In case of repairing, use the described parts only to prevent an accident.
- Please write the red √ mark on the board when the primary section of POWER SUPPLY (SYPS) Assy is repaired.
- Please take care to keep the space, not touching other parts when replacing the parts.

4. PCB CONNECTION DIAGRAM

NOTE FOR PCB DIAGRAMS :

1. Part numbers in PCB diagrams match those in the schematic diagrams.
2. A comparison between the main parts of PCB and schematic diagrams is shown below.

Symbol In PCB Diagrams	Symbol In Schematic Diagrams	Part Name
B C E	B C E B C E	Transistor
B C E	B C E B C E	Transistor with resistor
D G S	D G S D G S	Field effect transistor
		Resistor array
		3-terminal regulator

3. The parts mounted on this PCB include all necessary parts for several destinations.
   For further information for respective destinations, be sure to check with the schematic diagram.
4. View point of PCB diagrams.

5. PCB PARTS LIST

NOTES: ●*Parts marked by "NSP" are generally unavailable because they are not in our Master Spare Parts List.*
●*The ⚠ mark found on some component parts indicates the importance of the safety factor of the part. Therefore, when replacing, be sure to use parts of identical designation.*
●*When ordering resistors, first convert resistance values into code form as shown in the following examples.*
Ex.1 When there are 2 effective digits (any digit apart from 0), such as 560 ohm and 47k ohm (tolerance is shown by J=5%, and K=10%).

560 Ω	→	*56×10^1*	→	*561*	*RD1/4PU 5 6 1 J*
47k Ω	→	*47×10^3*	→	*473*	*RD1/4PU 4 7 3 J*
0.5 Ω	→	*R50*			*RN2H R 5 0 K*
1 Ω	→	*1R0*			*RS1P 1 R 0 K*

Ex.2 When there are 3 effective digits (such as in high precision metal film resistors).

5.62k Ω	→	*562×10^1*	→	*5621*	*RN1/4PC 5 6 2 1 F*

7. GENERAL INFORMATION

7.1 PARTS

7.1.1 IC

• The information shown in the list is basic information and may not correspond exactly to that shown in the schematic diagrams.

● List of IC

PE5030A, PE5012A, PD3381A

• For LA9701M (DVDM ASSY: IC101) and LC78651W (DVDM ASSY: IC201), refer to the service guide RRV2004.

■ PE5030A (FLKY ASSY : IC101)

• FL Control IC

● Pin Function

No.	Mark	Pin Name	I/O	Function	No.	Mark	Pin Name	I/O	Function

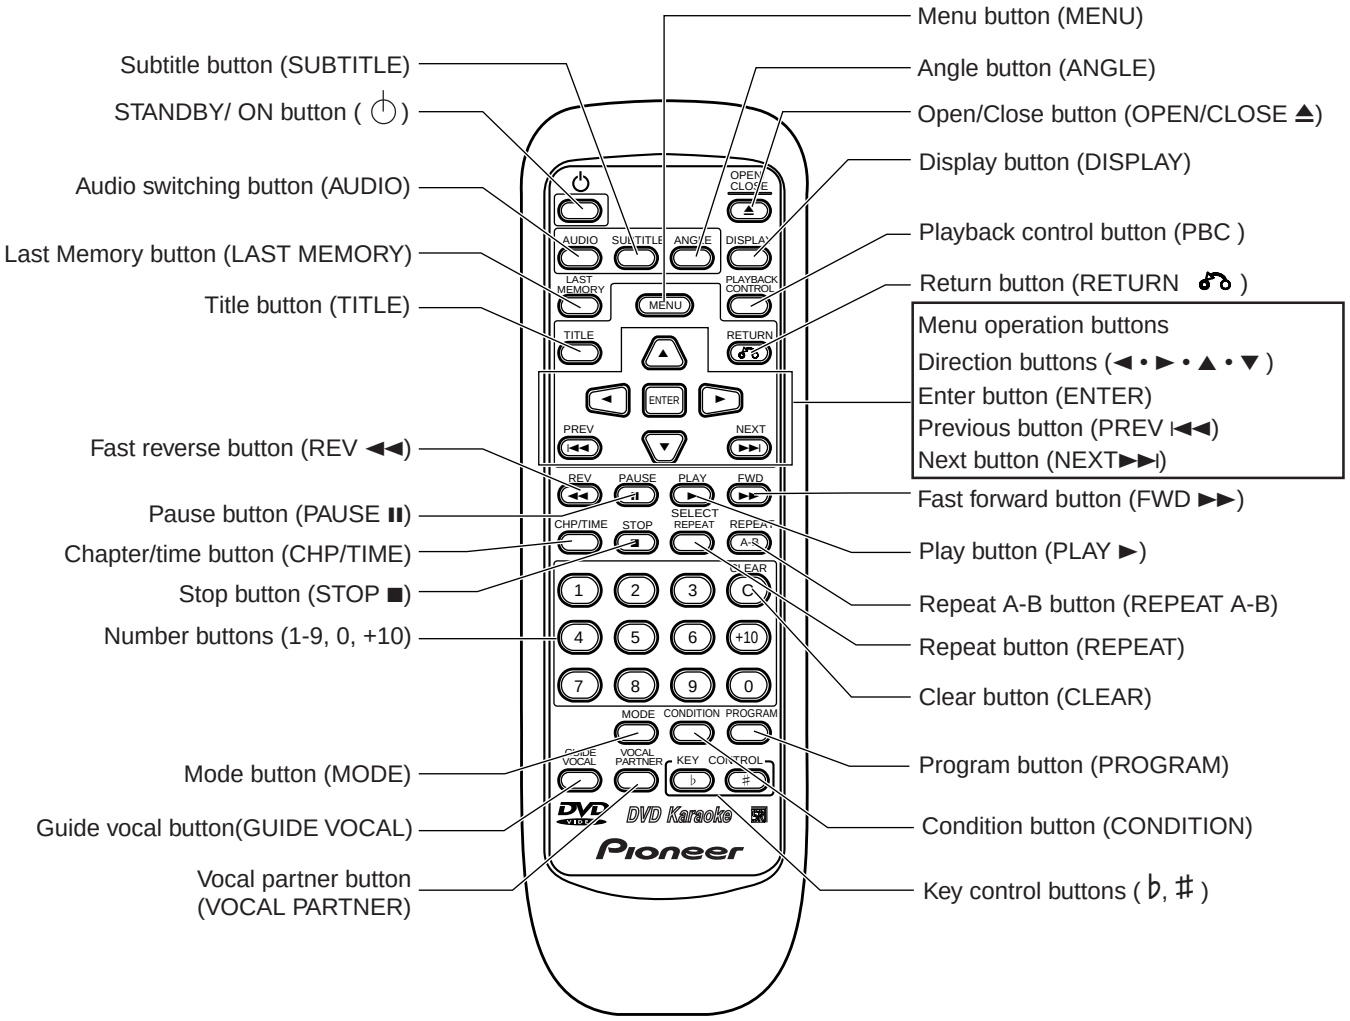
8. PANEL FACILITIES AND SPECIFICATIONS

8.1 PANEL FACILITIES

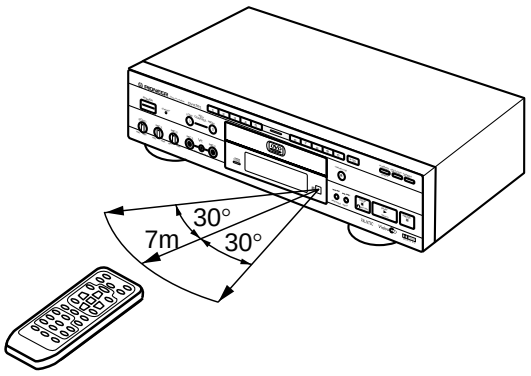
■ Remote control



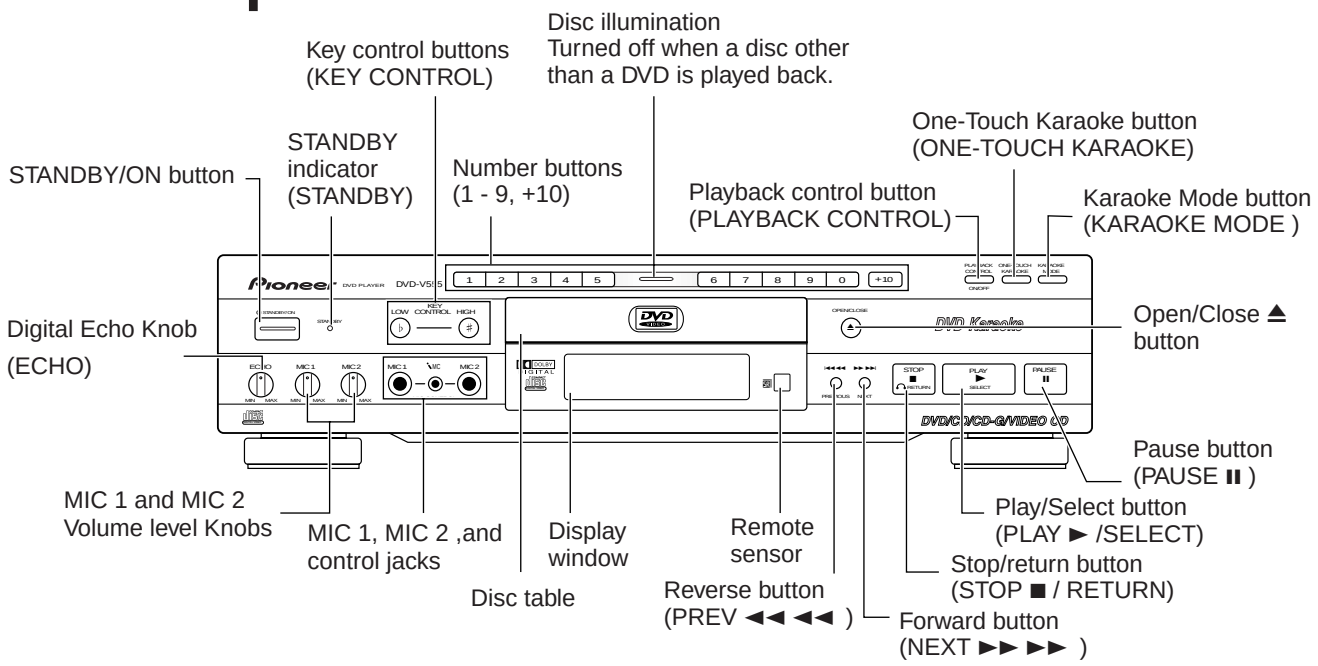
Remote control operation

When operating the remote control, point it at the remote sensor located on the player's front panel. The remote control can be used up to 23 feet (7 m) from the player and within a 30° angle each side of the sensor.

- Exposing the remote sensor to direct sunlight or strong light may cause faulty operation.
- If the CONTROL IN jack on the player's rear panel is connected to another component, point the remote control at that component for operation. Operation is not possible when pointed at this player.



■ Front panel



■ Rear panel

Digital Output Jack

This is used for output of the digital audio signal recorded on DVDs,CDs and Video CDs. Depending on the components connect this digital output to, noise may be generated.

Your amplifier	Regular AV amplifier	Coaxial	Connect to the coaxial jack, and select DOLBY DIGITAL → PCM from the menu.
		Optical	Connect to the optical jack, and select DOLBY DIGITAL → PCM from the menu.
	Dolby Digital (AC-3) compatible amplifier	Coaxial	Connect to the coaxial jack, and select DOLBY DIGITAL from the menu.
		Optical	Connect to the optical jack, and select DOLBY DIGITAL from the menu.

8.2 SPECIFICATIONS

General

System ..... DVD system, Video CD system and Compact Disc digital audio system
Power requirements: ..... AC 120 V, 60 Hz
Power consumption ..... 17 W
Weight ..... 3.0kg (6 lb 10 oz)
Dimensions ..... 420 (W) × 285 (D) × 104 (H) mm
(16 $^{9}/_{16}$ × 11 $^{4}/_{16}$ × 4 in.)
(Not including protruding cables, etc.)
Operating temperature ..... +5°C to +35°C (+41°F to +95°F)
Operating humidity ..... 5% to 85% (no condensation)

S-Video Output

Y (luminance) - Output level ..... 1 Vp-p (75Ω)
C (color) - Output level ..... 286 mVp-p (75Ω)
Jacks ..... S-VIDEO jack

Video Output

Output level ..... 1 Vp-p (75Ω)
Jacks ..... RCA

Audio Output

Output level
During audio output ..... 200 mVrms (1 kHz, –20 dB)
Number of channels 2
Jacks ..... RCA

Digital audio characteristics

Frequency response	4 Hz to 22 kHz (DVD fs: 48 kHz) 4 Hz to 20 kHz (CD)
S/N ratio	115 dB
Dynamic range	90 dB
Wow and flutter	Limit of measurement (± 0.001% W. PEAK) or lower

Other Terminals

Optical digital output ..... Optical digital jack
Coaxial digital output ..... RCA jack
CONTROL IN ..... Minijack (3.5ø)

Accessories

Microphone 1
Remote control unit 1

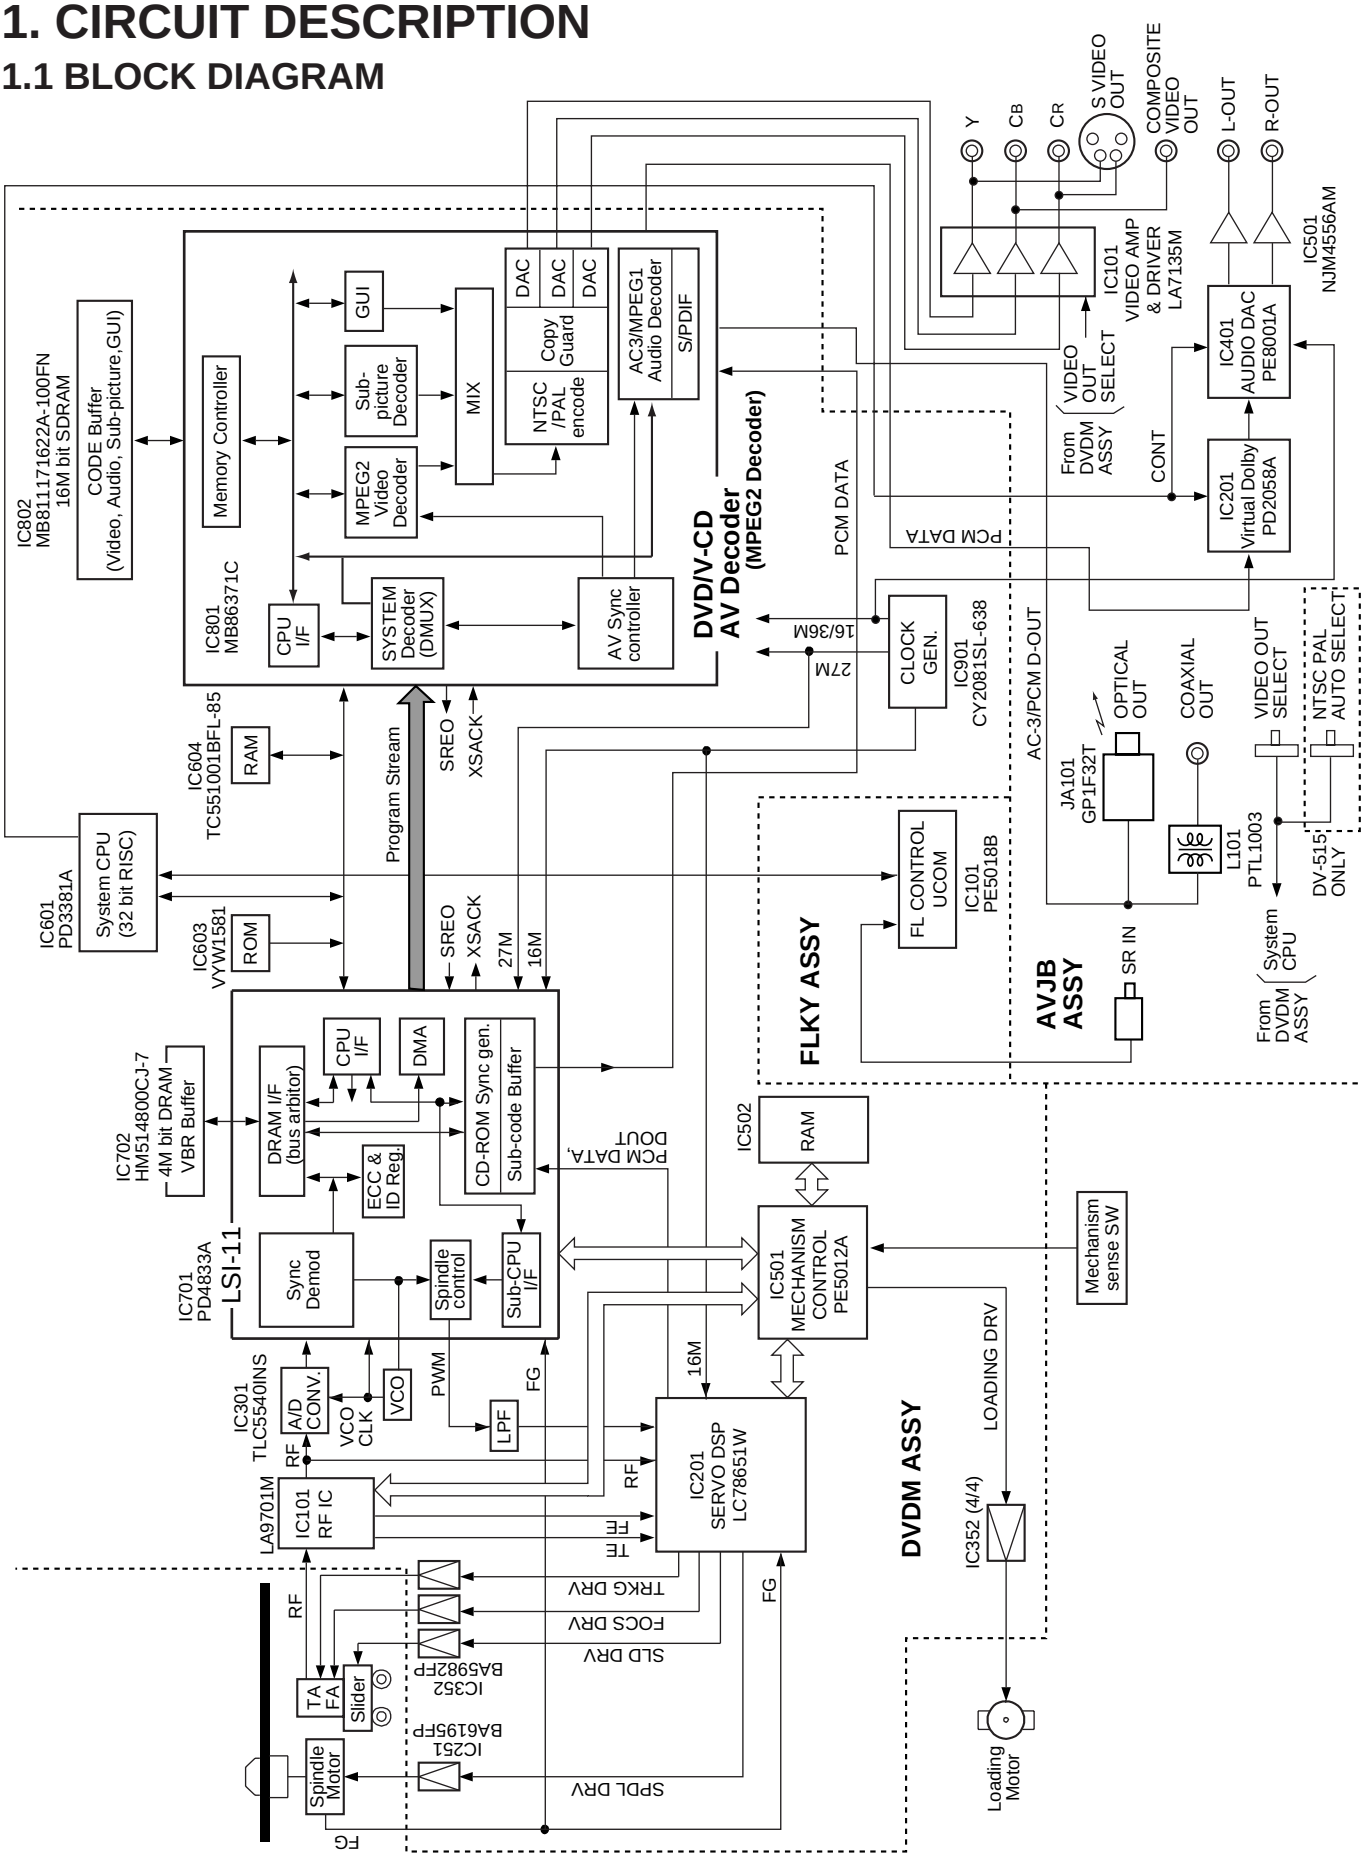
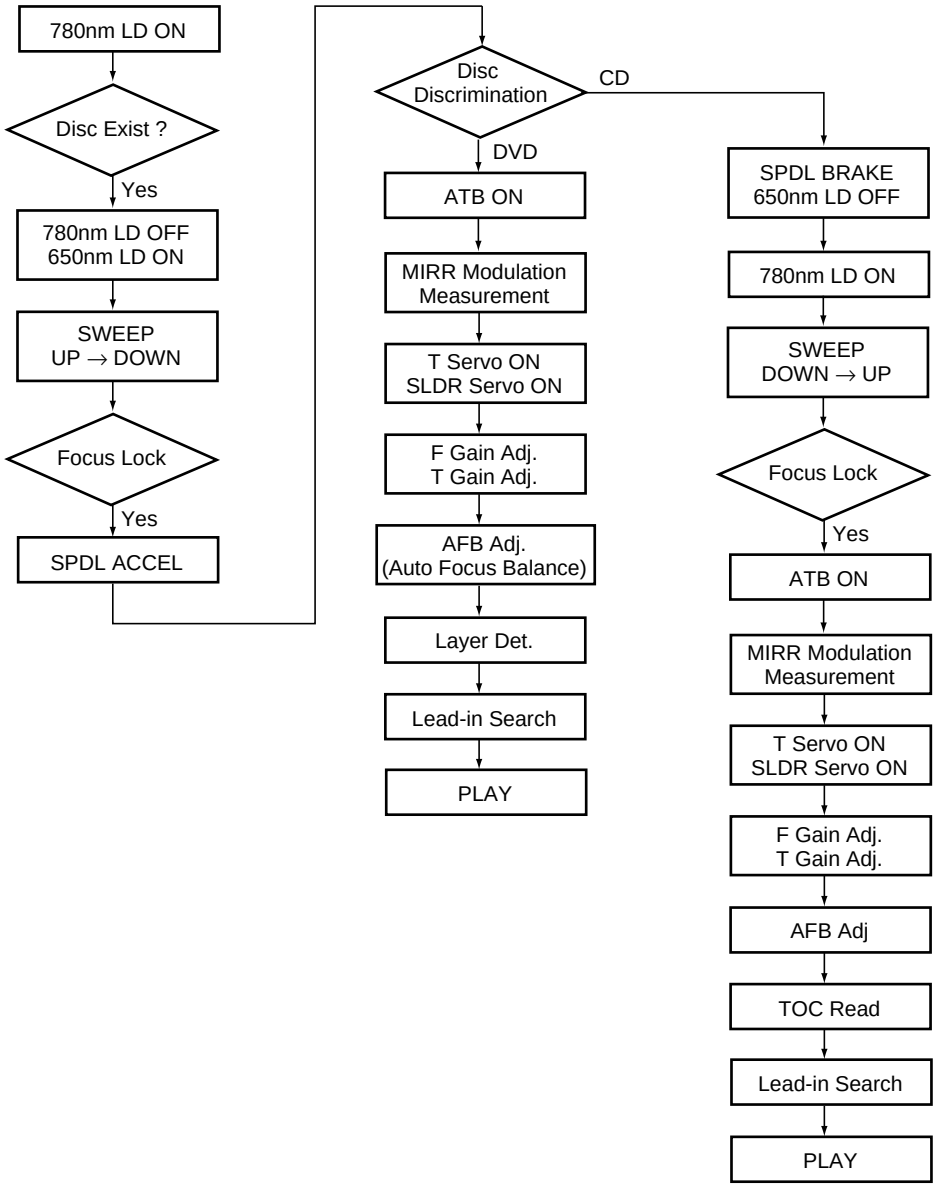
1. CIRCUIT DESCRIPTION

1.1 BLOCK DIAGRAM



1.2 EXPLANATION OF EACH MOVEMENT

1.2.1 Sequence Up to Playback

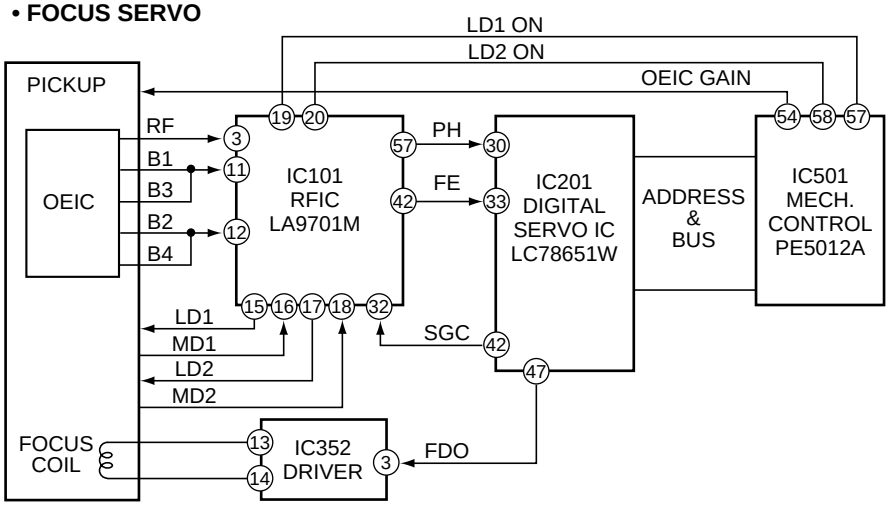


1.2.2 Focus Servo

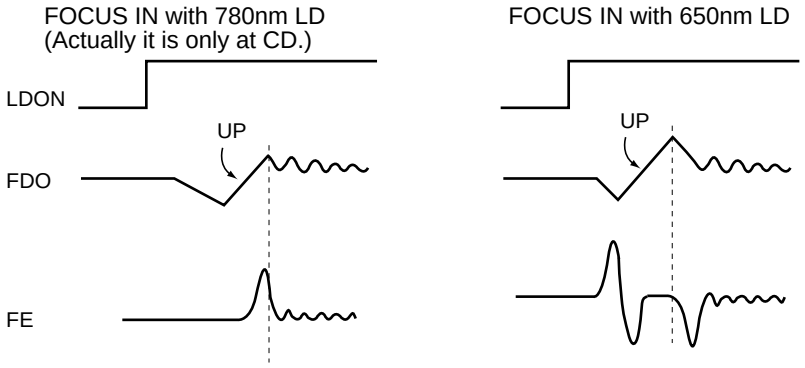
FE generated in the RF IC is sent to the Digital servo IC.
Both DVD and CD, the servo is turned on during the transition from “Upmost” to “Down” of the first-order sine wave with 650 nm LD ON (LD 1 ON = H). For a CD, it turns on during the transition from “Down” to “Up” of the first-order sine wave with 780 nm LD ON (LD 2 ON = H).

The kick-brake pulses, such as those for FOCUS jump, are also output from pin 47 (FDO) of IC201.

• FOCUS SERVO



• FOCUS LOCK TIMING



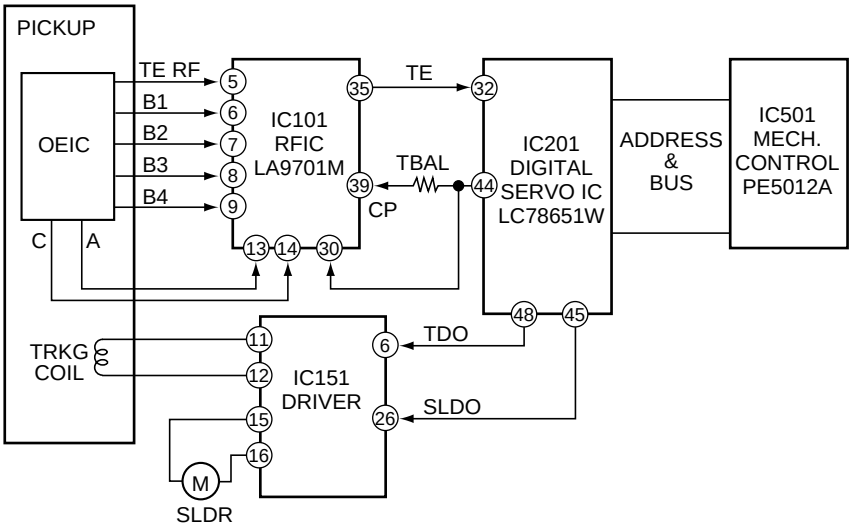
1.2.3 Tracking / Slider Servo

ATB: For phase differential TE (use for DVD), the tracking balance compensation is achieved by outputting the offset from the TBAL output at pin 44 of the digital servo IC, and by biasing the charge pump resistor for phase-difference error of RFIC.
For 3-beam TE (use for CD), the tracking balance compensation is achieved by adjusting the gain balance of A and C in RFIC with the voltage of RFIC-pin 30. The difference is detected by processing TE at pin 32 of IC 201 with an internal digital equalizer.

TDO: In addition to the servo output, the low-band components, such as the kick-brake for jump, are added for TDO output.

SLDO: The low-band components of TE are processed by the internal digital equalizer, and deadband is added for SLDO output. The offset voltage for pickup movement is also included in the SLDO output.

• TRACKING / SLIDER SERVO

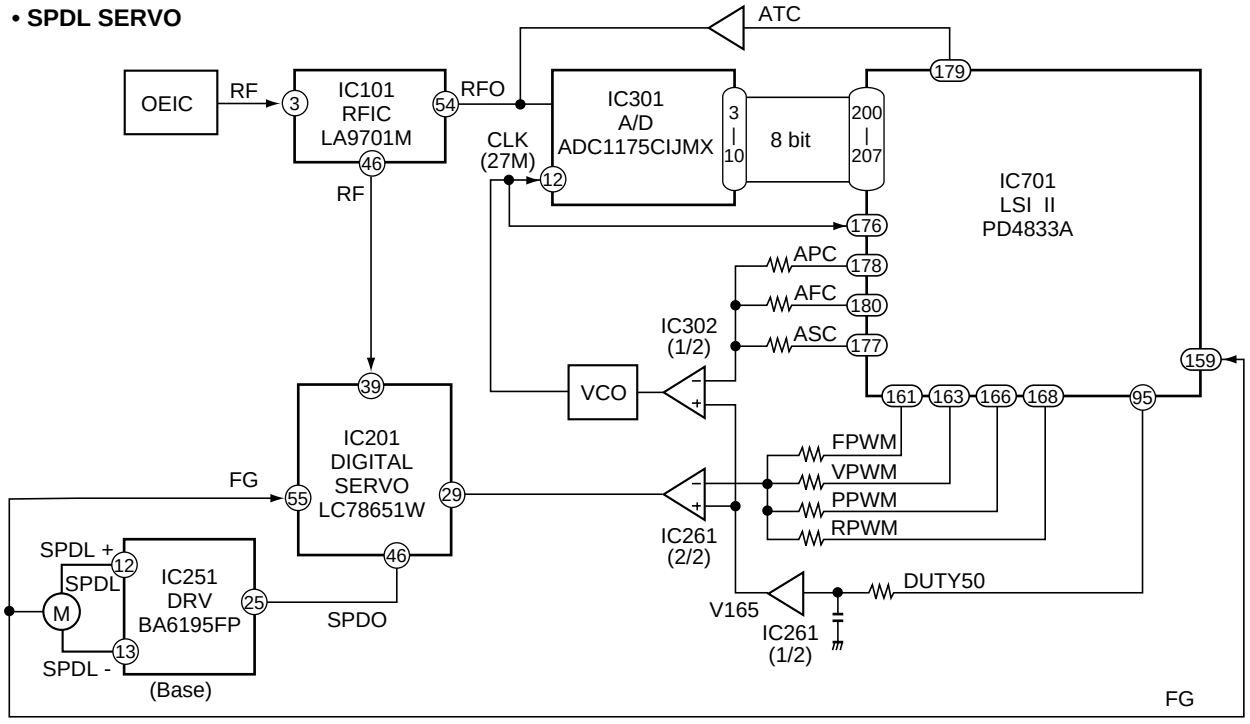


1.2.4 SPINDLE SERVO

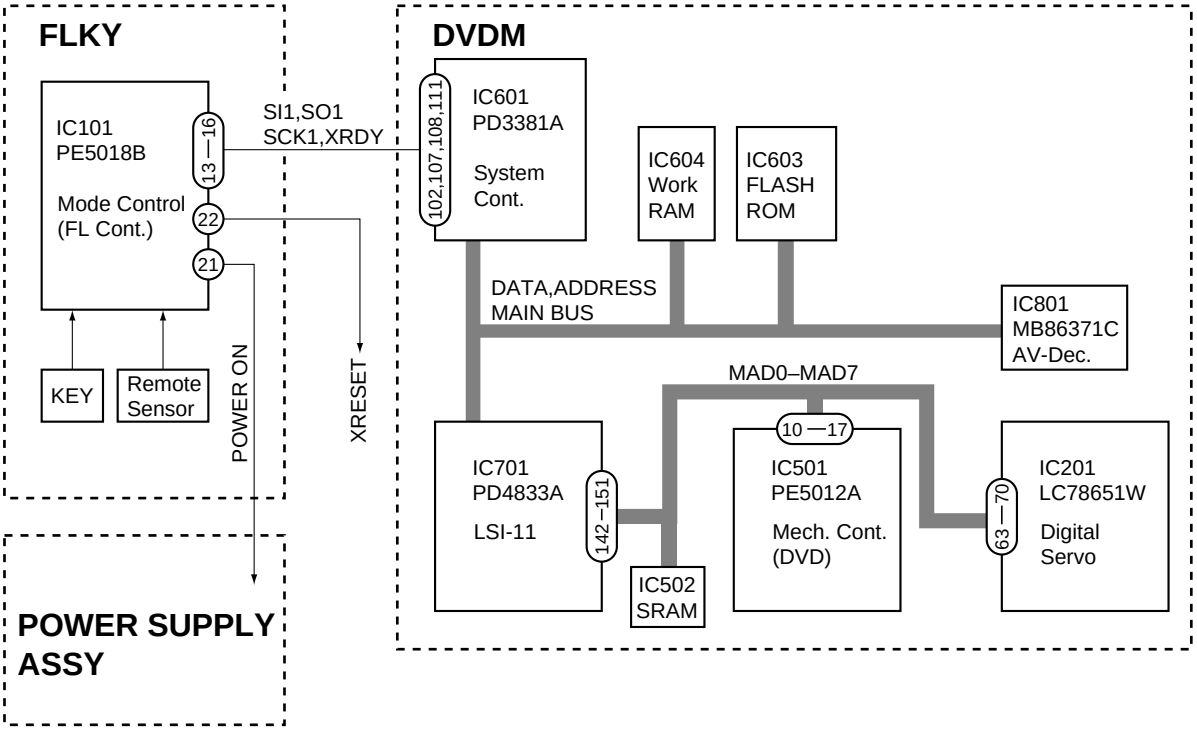
For a CD, the RF signal output from pin 46 of the RF IC is converted to binary in IC201. By comparing the binary value with the reference CLK (clock), the SPDL ERR signal is output from pin 46.

For a DVD, the SPDL ERR signal is generated from the PWM signal output from LSI-II. Upon receiving this signal via pin 29, IC201 also outputs it from pin 46, switching from the CD SPDL ERR signal.

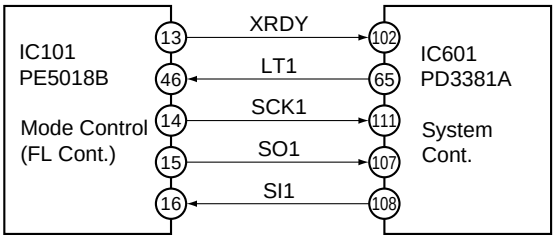
• SPDL SERVO

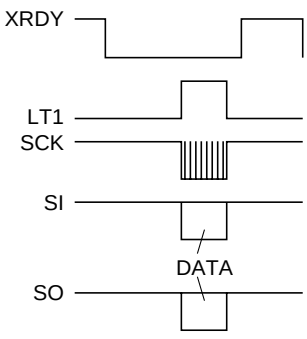


1.2.5 System Control (DV-515)



1) Interface between Mode Cont. and System Cont.





Timing Chart

If there is no communication for 2 sec.,
Mode Cont. turn off the power and reset.

2. TEST MODE

2.1 HOW TO ENTER THE TEST MODE

There is the two following methods in an enters of the test mode.

1. Input [ESC] key and [TEST/RANDOM] key of the LD test mode remote control unit in order under the power on condition.
2. Connect a personal computer with the RS232C terminal (CN106), and input entry command (TE) of test mode from the personal computer.

Note: FL indication and LED come all to light until key operation is done when entering the test mode.

2.2 RELEASE THE TEST MODE

There is the three following methods in a release of the test mode.

1. Turn the power off.
2. Press [ESC] key of the remote control unit. At this time, reset it for a while except for during the LD and CDV set.
3. Connect a personal computer with the RS232C terminal (CN106), and input normal mode entry command (NE) from the personal computer.

2.3 LIST OF TEST MODE FUNCTION

Contents of Command	Condition	Key Name of Remote Control Unit	Code of Remote Control Unit
Open	STOP	REPEAT A	A8 – 48
Close	OPEN	REPEAT A	A8 – 48
Stop	PLAY	REPEAT B	A8 – 44
Play (DVD is only tracing.) Increase the address (at FTS coefficient indication mode)	STOP ———	TV/LDP	A8 – 0F
Play (DVD is with decode.)	STOP	PLAY	A8 – 17
Pause on Decrease the address (at FTS coefficient indication mode)	PLAY ———	CX	A8 – 0E
Pause on/off	PLAY/PAUSE	PAUSE	A8 – 18
Search address input (0 to 9) ∗ Use for other numerical value input		0 to 9	A8 – 00 to 09
Search address input (A to F)	During address input	PGM+1 to 6	
① Search address clear ② Escape the search input mode	During address input Address = 0	CLEAR	A8 – 45
Change the search address input mode (Off→absolute address→addition→subtraction→Off) ∗ Use for other numerical value input		+10	A8 – 1F
Search execution (ignore the wrong address)		CHP/TIM	A8 – 13
Tracking open	PLAY	STEP FWD	A8 – 54
Tracking close	PLAY	STEP REV	A8 – 50
Slider in	TR : Off	SCAN REV Shuttle REV	A8 – 11 A8 – 2C to 2F
Low speed scan REV	TR : On	SCAN REV	A8 – 11
Scan REV (Jump number is variable)	TR : On	Shuttle REV	A8 – 2C to 2F
Slider out	TR : Off	SCAN FWD Shuttle FWD	A8 – 10 A8 – 28 to 2B
Low speed scan FWD	TR : On	SCAN FWD	A8 – 10
Scan FWD (Jump number is variable)	TR : On	Shuttle FWD	A8 – 28 to 2B
Loading in	STOP	SKIP REV	A8 – 53
Loading out	STOP	SKIP FWD	A8 – 52
LD on (650 nm)		TEST+1	A8 – 5E + A8 – 01

Contents of Command	Condition	Key Name of Remote Control Unit	Code of Remote Control Unit
Focus on		TEST+2	A8 – 5E + A8 – 02
Focus sweep		TEST+3	A8 – 5E + A8 – 03
LD on (780 nm)		TEST+4	A8 – 5E + A8 – 04
Focus jump +		MULTI FWD	A8 – 58
Focus jump –		MULTI REV	A8 – 55
Spindle FG on		TEST+5	A8 – 5E + A8 – 05
AFB on/off		TEST+6	A8 – 5E + A8 – 06
FTS coefficient indication	After the address four-digit input	TEST + 9	A8 – 5E + A8 – 09
CD error rate indication	PLAY	TEST + 0	A8 – 5E + A8 – 00
Jitter indication		TEST + DIG/ANA	A8 – 5E + A8 – 0C
Scrren indication on/Switching of the first and second screen	OSD : Off/On	DISPLAY	A8 – 43
Screen indication off	OSD : On	AUDIO	A8 – 1E
Screen indication on/off		PROGRAM	A8 – 4C
Switching of ID display methods (decimal/hexadecimal)		DIG/ANA	A8 – 0C
DISC type designation	STOP	HILITE/INTRO	A8 – 5A
• Forced designation to DVD		+1	+A8 – 01
• Forced designation to CD		+3	+A8 – 03
• Request for Disc sensing		+0	+A8 – 00
Tray close of disc sense inhibition	Checker mode	REPEAT A	A8 – 48
Background color (eight colors) switching		2/R	A8 – 49
Background color (eight colors) switching (reverse toggle)		1/L	A8 – 4B
Video : Component output		DIGITAL EFFECT	A8 – 5C
Video : Composite output		STILL WITH SOUND	A8 – 5B
Audio : 5.1CH forced output (5.1CH output model only)		TEST + FRONT	A8 – 5E + A3 – 99 AF – 65
Audio : Speaker setting change mode on (5.1CH output model only)		TEST + CENTER	A8 – 5E + A3 – 99 AF – 66
Audio : Speaker setting change (5.1CH output model only)		TEST + REAR	A8 – 5E + A3 – 99 AF – 67
Audio : 5.1CH forced output off and setting change mode off (5.1CH output model only)		TEST + LFE	A8 – 5E + A3 – 99 AF – 68
Audio : Speaker setting change mode on (5.1CH output model only)	Checker mode	ESC + CENTER	A8 – 5F + A3 – 99 AF – 66
Audio : Speaker setting change (5.1CH output model only)	Checker mode	ESC + REAR	A8 – 5F + A3 – 99 AF – 67
Audio : Speaker setting change mode off (5.1CH output model only)	Checker mode	ESC + LFE	A8 – 5F + A3 – 99 AF – 68
RF AGC OFF		D-LEVEL+0	A8 – 37 + A8 – 00
RF AGC ON		D-LEVEL+1	A8 – 37 + A8 – 01

● Special Mention Item

(1) Indications for the spindle status are as follows:
A/B : Spindle accelerator and brake
FG : FG servo
SRV : Rough, velocity/phase servo
O_S : Offset addition, rough, velocity/phase servo

(2) The movement of loading in/out starts from the tray open status. After that, this function is executed unless a play and close operation are done.

(3) There are three methods for entering a search address:
① Absolute address designation
→ Searching for the address entered
(indication for the most significant digit : >)
② Additional input
→ Searching for the address with the current ID number plus an entered number
(indication for the most significant digit : +)
③ Subtractive input
→ Searching for the address with the current ID number minus an entered number
(indication for the most significant digit : –)
The above modes can be changed by pressing [+10] key.
Note : A number for addition or subtraction must be entered in hexadecimal.

(4) If disc-type designation is forcibly executed during a mode other than Checker mode, the system controller will abandon disc-type designation after setting the mechanism controller. Therefore, after startup of the player, disc sensing will be performed again for safety.
If disc-type designation is forcibly executed during Checker mode, as disc-type designation is not abandoned, playback will be immediately started.

(5) A background color change in order of blue → green → light blue → red → purple → yellow → gray → black → with the [2/R] key.
It changes in order of gray → yellow → purple → red → light blue → green → blue → black → in the case of the [1/L] key.

(6) 5.1CH forced output becomes 5.1CH mode, the speaker setting will forcibly set to 3/2 + SW.

(7) Speaker setting change mode becomes 5.1CH mode, and it changes in order of 3/2+SW → 3/2 → 2/2+SW → 2/2 → 3/0+SW → 3/0 → 2/0.
It is the same as the test mode and the checker mode.

2.4 THE EXPLANATION OF EACH FUNCTION

2.4.1 FUNCTION

The function that can be operated in the test mode is as the following. Use a LD test mode remote control unit in the test mode.

(1) Door Open/Close

1. Press [REPEAT A] (48) key of the remote control unit.
2. Press [OPEN/CLOSE] key of the player from the stop condition.

(2) Stop

1. Press [REPEAT B] (44) key of the remote control unit.
2. Press [STOP] key of the remote control unit or the player from the stop condition.

(3) Play 1 (Demultiplex exist which it tries to output the playback screen)

1. Press [PLAY] (17) key of the remote control unit.
   • DVD rise up at the tracking close. Playback screen may not appear because the NAVI information isn't read in the test mode.

(4) Play 2 (Demultiplex is absent which performing trace only)

1. Press [TV/LDP] (0F) key of the remote control unit.
   • Perform only tracing with DVD, and there are no video and audio output.
2. Increase the address at the FTS coefficient indication mode.

(5) Pause

1. It becomes pause condition by pressing [CX] (0E) key of the remote control unit in the play.
   • ON/OFF changes alternately with DVD.
2. Pause ON/OFF changes alternately by pressing [PAUSE] (18) key in the play.
   • Only Play 2 is effective with DVD.
3. Decrease the address at the FTS coefficient indication mode.

(6) Tracking Open

1. Press [STEP FWD] (54) key of the remote control unit in the play condition.

(7) Tracking Close

1. Press [STEP REV] (50) key of the remote control unit in the play condition.

(8) Slider In

1. Press [SCAN REV] (11) key of the remote control unit in the tracking off condition.
2. Turn the shuttle of the remote control unit in the REV direction (2C to 2F) in the tracking off condition. (DVD only)

(9) Slider Out

1. Press [SCAN FWD] (10) key of the remote control unit in the tracking off condition.
2. Turn the shuttle of the remote control unit in the FWD direction (28 to 2A) in the tracking off condition. (DVD only)

(10) Scan In

1. Press [SCAN REV] (11) key of the remote control unit in the tracking on condition.
2. Turn the shuttle of the remote control unit in the REV direction (2C to 2F) in the tracking on condition.
   - DVD can be scanned only in the case of the play 2 (playback without demultiplex).

(11) Scan Out

1. Press [SCAN FWD] (10) key of the remote control unit in the tracking on condition.
2. Turn the shuttle of the remote control unit in the FWD direction (28 to 2A) in the tracking on condition.
   - DVD can be scanned only in the case of the play 2 (playback without demultiplex).

(12) Loading In/Out

When pressing [SKIP REV] (53) key of the remote control unit in the open condition, it loads in the clamp direction. Then it loads in the open direction when pressing [SKIP FWD] (52) key.

- This function can practice only when it is indicated with "OPEN" in FL.

(13) Search Address Input Entry

It becomes the address input mode when [+10] (1F) key is pressed. (indication for the most significant digit : >)
Indicate the last address as the initial condition in this time.
Only in case of DVD, addition search (indication for the most significant digit : +) and subtraction search (indication for the most significant digit : –) are able to select in order by pressing [+10] key continuously.
The address where input value was added to the present address is make to search with addition search.
The address where input value was subtracted to the present address is make to search with subtraction search.
In case of CD is only absolute time search.
Also address clear and release from the address input mode are able to perform by 2 steps by pressing [CLEAR] (45) key.

(14) Search Address Input

Press [0] to [9] keys of the remote control unit.
Set up the address by the hexadecimal number with DVD.
When [PROGRAM] (4C) key is pressed in the address input mode, input mode changes to hexadecimal number input (Indicates "*" mark), and [1] to [6] keys are input as [A] to [F].
At this time, [7], [8], [9] and [0] keys are not accepted.
Also the hexadecimal number input and the decimal number input can be changed with toggle.

(15) Search Practice

1. Press [CHP/TIM] (13) key of the remote control unit.
   Practice the on screen no playback (Doesn't demultiplex) after the search with DVD.
2. Press [PLAY] (17) key of the remote control unit.
   Practice the on screen playback (demultiplex exists) after the search with DVD.

(16) Auto Digital On/Off

Auto Digital ON/OFF switches every time [DIG/ANA] (0C) key of the remote control unit is pressed.

(17) Screen Display On

1. Press [DISPLAY] (43) key of the remote control unit.
2. Display on/off switches every time [PROGRAM] (4C) key of the remote control unit is pressed.
   - When [DISPLAY] key is pressed in the display on, change the part number indication of the microprocessor and revision indication.
   - Initial state is screen display on and it becomes the part number indication of the microprocessor.

(18) Screen Display Off

1. Press [AUDIO] (1E) key of the remote control unit.
2. Display on/off switches every time [PROGRAM] (4C) key of the remote control unit is pressed.

(19) Focus Jump +

Focus jumps in 1 layer from 0 layer when [MULTI FWD] (58) key of the remote control unit is pressed. (DVD only)

(20) Focus Jump –

Focus jumps in 0 layer from 1 layer when [MULTI REV] (55) key of the remote control unit is pressed. (DVD only)

2.4.2 EXPANSION FUNCTION 1

Set the reception mode of expansion function by pressing [TEST] (5E) key of the LD test mode remote control unit, then expansion function is able to execute by pressing the following keys.
Indication for the most significant digit becomes "T" during the reception mode of expansion function. (This mode can on and off with toggle.)

(1) LD On (650n)

Turn the laser diode to on by pressing [TEST] and [1] keys in order.

(2) Focus On

Focus locks by pressing [TEST] and [2] keys in order.

(3) Focus Sweep

Repeat focus sweep by pressing [TEST] and [3] keys in order.

(4) LD On (780n)

Turn the laser diode to on by pressing [TEST] and [4] keys in order.

(5) Spindle FG Servo

Rising up the spindle and FG servo becomes on by pressing [TEST] and [5] keys in order.

(6) AFB On/Off

Switch the AFB on and off with toggle by pressing [TEST] and [6] keys in order.

(7) AGC On/Off

Switch the AGC on and off with toggle by pressing [TEST] and [7] keys in order.

(8) Jitter Value Indication

It becomes the jitter-value indication mode by pressing [TEST] and [DIG/ANA] keys in order.

(9) DSP Coefficient Indication of FTS System

Set up the address (four digits) of the coefficient that it wants to see by the point of search address input, then real time indicates the coefficient in OSD by pressing [TEST] and [9] keys in order.

(10) CD Error Rate Indication

Indicate the value in OSD after measuring is completed by pressing [TEST] and [0] keys in order after set up the measuring time (1 to 8 seconds) by the point of search address input.

(11) Skirt Terminal Output Setting (VIDEO)

Turn the output video signal to VIDEO by pressing [TEST] and [AUDIO] keys in order.

(12) Skirt Terminal Output Setting (S-VIDEO)

Turn the output video signal to S-VIDEO by pressing [TEST] and [SUBTITLE] keys in order.

(13) Skirt Terminal Output Setting (RGB)

Turn the output video signal to RGB by pressing [TEST] and [ANGLE] keys in order.

(14) Virtual Dolby (VDS) ON

Turn the virtual dolby to ON by pressing [TEST] and [FWD SKIP] keys in order. (It is effective in this more than 5 ch of AC3.)

(15) Virtual Dolby (VDS) OFF

Turn the virtual dolby to OFF by pressing [TEST] and [REV SKIP] keys in order.

2.4.3 EXPANSION FUNCTION 2

Set the reception mode of expansion function 2 by pressing [HILITE/INTRO] (55) key of the remote control unit, then expansion function 2 is able to execute by pressing the following keys.

(1) Forced DVD Setting

In the checker mode, set up the condition that DVD is attached forcibly except for the result of disc distinction by pressing [HILITE/INTRO] and [1] keys in order.
In the no checker mode (normal test mode), once execute the setting but abandan it soon.
Therefore, perform the disc distinction again for the safety when rising up the player in this condition.

(2) Forced CD Setting

In the checker mode, set up the condition that CD is attached forcibly except for the result of disc distinction by pressing [HILITE/INTRO] and [3] keys in order.
In the no checker mode (normal test mode), once execute the setting but abandan it soon.
Therefore, perform the disc distinction again for the safety when rising up the player in this condition.

(3) Execute the Disk Distinction

In the checker mode, execute the disc distinction result by pressing [HILITE/INTRO] and [0] keys in order.

2.4.4 EXPANSION FUNCTION 3 (AGC Manual Setting Mode)

Enter theAGC Manual Setting mode by pressing the [D-LEVEL CTRL] (37) key on the remote control unit. This function is enabled when AGC is off with a DVD set.

How to set

When the [D-LEVEL CTRL] (37) key is pressed with a DVD set, brackets [ ] are displayed to the right of the ATB setting, showing that the AGC Manual Setting mode has been entered.
In this condition, AGC set on/off can be achieved by pressing the [0] or [1] key. The set value is displayed in the brackets.
To exit the AGC Manual Setting mode, press the [D-LEVEL CTRL] key again or call the Search Address Input mode with the [+10] key.

2.5 PLAYER REGION CONFIRMATION

This function enables you to confirm the region code and version of ROM in the player.
Use the LD test mode remote control unit for service(GGF1067).

(1) Entry

Press the [ESC] key and [Clear] key in the LD test mode remote control unit to enter region confirmation mode.

(2) Confirmation

Region code and ROM version is displayed on the monitor so you can confirm each code.
(Of course, Region code can not be changed.)

(3) Exit

Press the [ESC] key to exit the Region confirmation mode.

* This function also resets the unit to the initial settings (When shipped from the factory). In fact, User setting(Parental level code number, Condition memory, Last memory, Set-up menu data etc.,) will be lost.

2.6 RAM DISPLAY MODE

This function provides a real time display of the RAM contents at the specified address of the system controller or the mechanism controller.
The display for the system controller shows four bytes, and that for the mechanism controller shows one byte. They cannot, however, be simultaneously monitored. Use the LD test mode remote control unit for this operation.

(1) Entry

Press the [ESC] key and the [TV/LDP] key in sequence to enter the RAM Display mode.

(2) Displays

In this mode, the lowest line of the OSD shows the following:

00000 : 55000000 < F000 : 0001
① ② ③ ④ ⑤

① : Lower 5 digits of the specified RAM address of the system controller. (The actual address is 010XXXXX h.)
② : Contents at the specified address of the system controller (The leftmost byte corresponds to the specified address.)
③ : The angle bracket points to the controller whose data are being displayed in real time.
④ : Lower 4 digits of the specified RAM address of the mechanism controller
⑤ : Contents at the specified address of the mechanism controller

(3) Address setting

Each time you press the [DISPLAY] key, the system controller and the mechanism controller are selected in turn (the angle bracket ③ points toward the current selection).
Pressing the [TV/LDP] key increases the address.
Pressing the [CX] key decreases the address.
Holding these keys increases or decreases the address in units of ten.

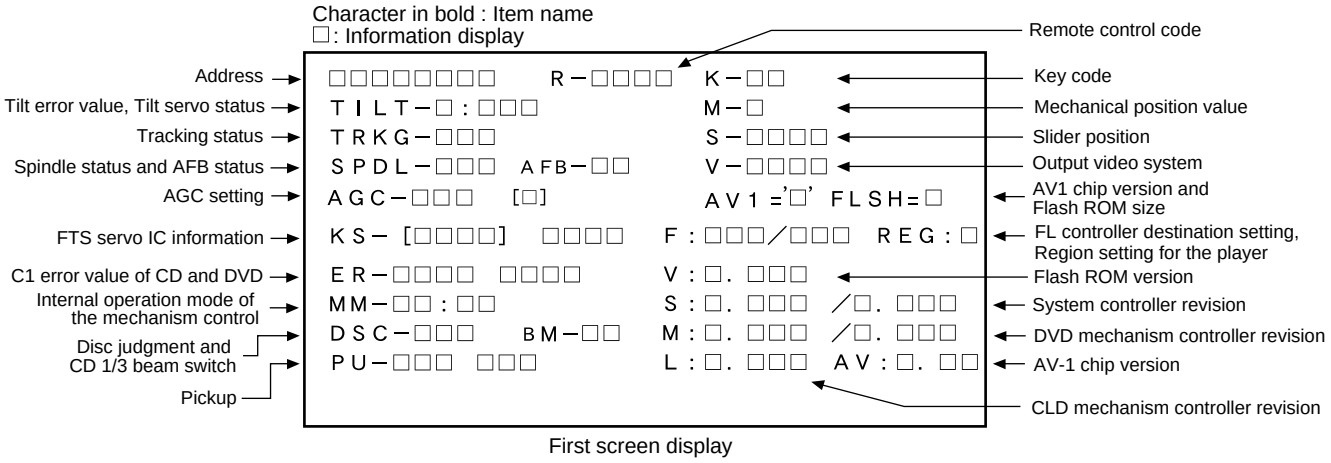
(4) Exit

Press the [ESC] key again to exit this mode.

2.7 TEST MODE SCREEN DISPLAY

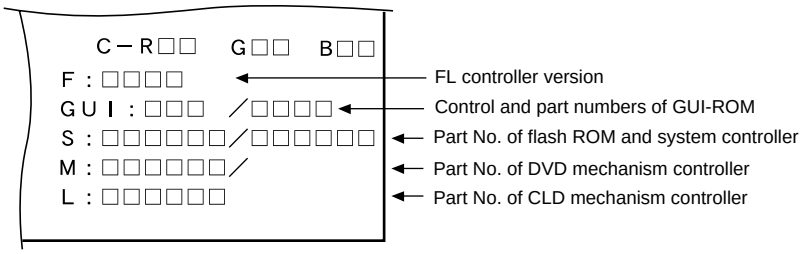
Consecutive double-OSD display is supported during test mode. The screen is composed 10 lines with a maximum of 32 characters per line. It can't be used with the debugging display mode together. Screen display contents including the CLD model.

• Screen Composition



First screen display

Caution :
The first screen and second screen switch by pressing [DISPLAY] key of the remote control unit.
It is only a version display part on the lower right of the screen those contents of display change.
ATB : ON/OFF information display and AGC manual setting display deleted with the second generation.



Second screen display (at lower right portion of the screen)

• Description of Each Item on the Display

(1) Address indication

The address being traced is displayed in number.

DVD	: ID indication (hexadecimal number, 8 digits)	[＊＊＊＊＊＊＊＊]
CD/LD (CLV)	: A-TIME (min. sec.)	[0 0 0 0 ＊＊＊＊]
LD (CAV)	: FRAME	[0 0 0 ＊＊＊＊＊]

(Note : For DVDs, decimal-number indication is possible.)

(2) Code indication of the remote control unit [R – ＊＊＊＊]

The code for the key pressed on the remote control unit, which is received by the FL controller, is displayed while the key is pressed. In the case of the double code, the second code will be displayed.

(3) Key code indication for the main unit [K – ＊＊]

The code for the key pressed on the main unit, which is received by the system controller, is displayed while the key is pressed.

(4) Tilt error value, Tilt servo status [TILT – ＊ : ＊＊＊]

Tilt error value :	[0] to [F]
Tilt servo status :	
Tilt neutral	[N]
Tilt servo on	[ON]
Tilt servo off	[OFF]

(5) Tracking status [TRKG – ＊＊＊]

Tracking on	[ON]
Tracking off	[OFF]

(6) Spindle status [SPDL – ＊＊＊]

Spindle accelerator and brake	[A/B]
FG servo	[FG]
Rough, velocity phase servo	[SRV]
Offset addition, rough, velocity phase servo	[O_S]

(7) Mechanism position value [M – ＊]

Position code	[0] to [8]

(8) Slider position [S – ＊＊＊＊]

CD TOC area	[IN]
CD active area	[CD]
CDV video area	[CDV]
LD active area	[LD]
Side B inside	[B IN]

(9) AGC setting [AGC – ＊＊] [＊]

AGC on	[AGC-ON]
AGC off	[AGC-OFF]
RF AGC on	[1]
RF AGC off	[0]

(10) Output video system [V – ＊＊＊＊]

NTSC system	[NTSC]
PAL system	[PAL]
Auto-setting	[AUTO]

(11) FTS servo IC information

Indications for the following two types of information can be switched:

① DSP coefficient indication [KS – [＊＊＊＊] ＊＊＊＊]
Displays the address (four digits) of the specified coefficient and the setting value (four digits) with [TEST] and [9] keys.

② Jitter value indication [JT – [0 0 0 0] ＊＊＊＊]
Displays the jitter value (four digits) with [TEST] and [DIG/ANA] keys.

(12) Error rate indication

① C1 error value of CD [ER – C1 ＊＊＊＊]
② C1 error value of DVD [ER – ＊＊＊＊ ＊＊＊＊]

(13) Internal operation mode of mechanism controller [MM – ＊＊ : ＊＊]

Internal mechanism mode (2 digits) and internal mechanism step (2 digits) of the mechanism controller
Note : For details, see the specifications of the mechanism controller.

(14) ① Disk sensing [DSC – ＊＊＊]

The type of discs loaded is displayed.
[DVD], [CD], [CDV], [LD], [VCD], [ ]

② CD 1/3 beam switch [BM – ＊＊]

(15) Pickup [PU – ＊＊＊]

The pickup being operating is displayed.

DVD	[DVD]
CLD	[CLD]

The wavelength 650 or 780 is displayed while executing LD on (approx. 10 seconds) with the command.

DVD 650	[DVD 650 nm during LD on]
DVD 780	[DVD 780 nm during LD on]

(16) Version of the AV-1 chip [AV1 = ' ＊ ']

Flash ROM size [FLASH=＊]

(17) ① Destination setting of the FL controller [F : ＊＊＊ / ＊＊＊]

Three characters in front represent the type of model:
515 : DV-515, H9 : DVL-H9, 414 : DV-414,
05 : DV-05, 919 : DVL-919, 717 : DV-717
Three characters that follow represent the destination code.
J : /J, K: /KU, /KC, /KU/KC,
R: /RAM/RL/RD/LB, WY: /WY,

② Region setting of the player [REG : ＊]

Setting value [1] to [6]

(18) Version of the flash ROM [V : ＊ . ＊＊＊]

(19) Revision of the system controller [S : ＊ . ＊＊＊ / ＊ . ＊＊]

① Revision number of the external ROM part (flash ROM) of the system controller <Front>
② Revision of the internal ROM part of the system controller <Rear>

(20) Revision of the DVD mechanism controller [M : ＊ . ＊＊＊ / ＊ . ＊＊＊]

① Revision number of the external ROM part (flash ROM) of the DVD mechanism controller <Front>
② Revision of the internal ROM (core part) of the DVD mechanism controller <Rear>

(21) Revision of the CLD mechanism controller [L : ＊ . ＊＊＊]

(22) Version of the AV-1 chip [AV : ＊ . ＊＊]

(23) Version of the FL controller [F : ＊ . ＊]

(24) Control and part numbers of the GUI-ROM [GUI : ＊＊＊ / ＊＊＊＊]

① Control number of the GUI-ROM (3-figure number of decimal) <Front>
② Part number of the GUI-ROM <Rear>
No GUI model displays as "—— / ——".

(25) The part number of the flash ROM and system controller [S : ＊＊＊＊＊＊ / ＊＊＊＊＊＊＊]

① Part number of the flash ROM <Front>
(Example) VYW1536-A → W1536A
(Example) PD6256A9 → 6256A9
② Part number of the system controller <Rear>
(Example) PD3381T1 → 3381T1

(26) Part number of the DVD mechanism controller

(Example) PD4889A0 → 4889A0
(PE5012A0)

(27) Part number of the CLD mechanism controller

(Example) PD0260A2 → 0260A2

(28) 5.1CH output mode indication (5.1/2)

(29), (30), (31) Speaker ON/OFF indication

3. ERROR CODE

Error codes that are displayed on the FL display without using the remote control unit

FL Display	Detecting Microcomputer	Possible causes	Operation of the unit
GUI ROM ERROR	System controller	Difference in versions of the GUI-ROM and of the software for the system controller	Operates as an OSD model
FLASH ID	System controller	Difference in versions of the One-Time of the system controller and of the flash ROM, or bus line failure	No operation
FLASH SIG	System controller	Difference in memory IDs of the flash ROM	
FLASH WRP	System controller	Write protect error of the flash ROM	No operation
FLASH SUM	System controller	Check sum error of the flash ROM	No operation
MECHA CPU	System controller	Downloading of the software for the mechanical controller not started	No operation
ILLGAL	System controller	The system controller fetched a code other than an operation code	No operation
SLOT	System controller	Inappropriate slot command issued	No operation
CPU AERR	System controller	CPU address error	No operation
DMA AERR	System controller	DMA address error	No operation
AV1 VER	System controller	Difference in versions of the unit and of the AV1	
RESERVE	System controller	Undefined interrupt	No operation

Error codes that are displayed on the FL display by using the remote control unit (Mechanism controller error)

To display: ESC + DISPLAY + DISPLAY; Location of the display: At the center of the FL display

FL	Description of Error	Detecting Microcomputer	Causes if with a DVD	Causes if with a CD (LD)	Operation of the Unit
11	Search timeout	DVD mechanism controller	Search could not be complete within 10 seconds.	Search could not be complete within 7 seconds, and it could not enter the target area within 10 seconds by VCD scan.	CD: Stops, DVD: Continues operation
12	Search retry error	DVD mechanism controller	A search could not be completed after 3 retries, search backup was executed 4 times, or in a case of timeout (6 seconds) while the unit was tracing 11 tracks or more beyond the target while the search operation was converging.	Backup against slider skip was executed 4 times during a search, or slider skip twice resulted in starting from the read-in point.	CD: Stops, DVD: Continues operation
19	Tracing timeout while converging	DVD mechanism controller	Timeout (10.5 seconds) while tracing at the stage of convergence of a search.		Stop
1B	Index 0 search error	DVD mechanism controller		During Track (Index) Search, the search for the beginning of a program could not be completed within 3 seconds (20 seconds in the case of Index Search) after positioning based on the TOC data was completed.	Stop
22	Timeout of slider inner circumference	DVD mechanism controller	Inside switch could not ON within 2 seconds.		Stop
23	Timeout of slider outer circumference	DVD mechanism controller	Inside switch could not OFF within 2 seconds.		Stop
33	No FOK pulse during playback CLVA	DVD mechanism controller	No FOK pulse during 4 loops or more after the spindle was PLL locked and restarting was tried 4 times and more. No FOK pulse during 4 loops or more until the spindle was PLL-locked after the spindle kick.	No FOK pulse during 2 loops or more after the spindle was PLL-locked and restarting was tried 4 times and more. No FOK pulse during 2 loops or more until the PLL was locked after CLVA.	Adjusts focus at the innermost circumference and tries to return to its position where the error was generated (for 3 times),then opens. If the same error persists after one retry, the tray opens. (No FOK pulse)
38	Disc-type-sensing error	DVD mechanism controller	If normal starting was impossible in the following three cases, disc-type sensing will be retried if error No. 33, 4*, 5*, 7*, or C3 occurs: (1) startup with the first disc-type-sensing result, (2) forced startup with another disc by designating the disc type, (3) forced startup with the original disc by designating the disc type.		Open

FL	Description of Error	Detecting Microcomputer	Causes if with a DVD	Causes if with a CD (LD)	Operation of the Unit
39	SGC converge timeout	DVD mechanism controller	SGC could not converge during detects the peak		Open
41	Spindle timeout	DVD mechanism controller	The unit did not enter Stop mode within 10 seconds of issuance of a Stop command.		Stop
48	Spindle FG transition timeout	DVD mechanism controller	The spindle could not converge into within ± 12% of the target FG rotation speed within 10 seconds after spindle kick, or the target FG rotation speed was not achieved 5 times or with 1-mS-interval interrupts within 150 mS after AGC was completed.		Stops. (FG timeout)
49	Spindle PLL transition timeout	DVD mechanism controller	The rotation speed of the spindle became 1.5-fold and more that at the innermost circumference of the DVD during three loops, or the spindle could not be locked within 1 second before AGC started.		Stops. ("73" is displayed during starting process.)
4A	Spindle lock timeout	DVD mechanism controller	Spindle could not lock more than 1 second before start the AFB.		Stops. ("73" is displayed during starting process.)
51	Auto sequence timeout of peak detection	DVD mechanism controller	ABUSY did not return within a specified time after the DDTCT (peak detection) command was sent.		Stop
52	Auto sequence timeout of focus jump down	DVD mechanism controller	ABUSY did not return within a specified time after the FJMPD (Focus jump 1 to 0) command was sent.		Stop
53	Auto sequence timeout of focus jump up	DVD mechanism controller	ABUSY did not return within a specified time after the FJMPU (Focus jump 0 to 1) command was sent.		Stop
54	Auto sequence timeout of play AGC	DVD mechanism controller	ABUSY did not return within a specified time after the GSUMON (play-AGC-measuring) command was sent.		Stop
55	Auto sequence timeout of disc-type-sensing	DVD mechanism controller	ABUSY did not return within a specified time after the DJSRT (disc-sensing) command was sent.		Stop
56	Auto sequence timeout of ATB2	DVD mechanism controller	ABUSY did not return within a specified time after the TBLOFS (Internal ATB after the completion of external ATB) command was sent.		Stop
57	Auto sequence timeout of tracking servo ON	DVD mechanism controller	ABUSY did not return within a specified time after the TSON (tracking servo ON) command was sent.		Stop
58	Auto sequence timeout of ATB1	DVD mechanism controller	ABUSY did not return within a specified time after the TBL (external ATB) command was sent.		Stop
59	Auto sequence timeout of focus gain adjustment	DVD mechanism controller	ABUSY did not return within a specified time after the FGN (focus gain adjustment) command was sent.		Stop
5A	Auto sequence timeout of tracking gain adjustment	DVD mechanism controller	ABUSY did not return within a specified time after TGN (tracking gain adjustment) command was sent.		Stop
5B	Auto sequence timeout of offset adjustment	DVD mechanism controller	ABUSY did not return within a specified time after the CMDAVE (offset adjustment) command was sent.		Stop
5C	Auto sequence timeout of modulation factor measurement	DVD mechanism controller	ABUSY did not return within a specified time after the ADJMIR (modulation factor measurement) command was sent.		Stop
5D	Auto sequence timeout of auto focus bias	DVD mechanism controller	ABUSY did not return within 2 seconds after the AFB (auto focus bias) command was sent.		Stop
5E	Auto sequence timeout of RF count	DVD mechanism controller	ABUSY did not return within a specified time after the RFSMP (RF count) command was sent.		Stop
5F	Auto sequence already busy	DVD mechanism controller	A command could not be sent because ABUSY was low.		Stop
62	Pause retry error	DVD mechanism controller	Pause mode could not be restored within three retries after it had been released.		Continues operation

FL	Description of Error	Detecting Microcomputer	Causes if with a DVD	Causes if with a CD (LD)	Operation of the Unit
71	ID readout check failure during playback	DVD mechanism controller	An ID could not be read for 160 loops (about 480 mS) or more during tracing, or recovery (restart) was tried for 3 times after detecting high speed (1.3-fold of ID=20000H rotation) or low speed (0.7-fold of ID=300000H rotation).		Stop
72	Subcode check failure during playback	DVD mechanism controller		No frame could be read for 3 seconds or more, or the subcode could not be read during 2 seconds before the TOC read-in search.	Stop
73	ID readout failure during startup	DVD mechanism controller	An ID could not be read within 1 second after PLL lock, or the spindle detected an abnormality (uncapturable [beyond ± 12%] high speed [1.5-fold of ID=20000H rotation] within 5 seconds after finishing the kick.		Opens (ID readout failure)
74	Subcode check failure during startup	DVD mechanism controller		No subcode could be read within 3 seconds after AFB had been finished.	Opens (Subcode readout failure).
81	Timeout for reading TOC of the mechanism controller	DVD mechanism controller		TOC readout took 30 seconds or more.	Stop
82	Timeout for reading TOC of the system controller	DVD mechanism controller		Reading TOC of the system controller took 30 seconds or more.	Stop
A1	Communication timeout of DSP command	DVD mechanism controller	A command could not be issued to DSP because Command Busy (XCBUSY) was in force (XCBUSY = L) for a specified time (about 1024 mS).		Open
A2	Communication timeout for reading DSP coefficient	DVD mechanism controller	Command Busy (XCBUSY) was in force for a specified time (about 1024 mS) before and after a coefficient read command was issued to DSP, or the address echo-back after command issuance did not match the setup address.		Open
A3	Communication timeout for writing DSP coefficient	DVD mechanism controller	Command Busy (XCBUSY) was in force for a specified time (about 1024 mS) before and after the coefficient write command was issued to DSP.		Open
A4	Communication timeout for continuously writing DSP coefficient	DVD mechanism controller	Command Busy (XCBUSY) was in force for a specified time during continuous coefficient writing, or before and after a continuous write command was issued to DSP.		Open
B1	Timeout error for backup	DVD mechanism controller	Codes could not be read for a specified time during the backup process.		Stops (the mechanical controller operates independently).
B2	Retry error for backup	DVD mechanism controller	Tracing impossible after a specified number of iterations of backup operations.		Stops (the mechanical controller operates independently).
B3	Retry error for trace	DVD mechanism controller	During tracing, runaway was detected after three iterations of backup operations for detecting runaway.		Stops (the mechanical controller operates independently).
C3	Detection of tracking overcurrent	DVD mechanism controller	During playback, the overcurrent detection port was at L for 300 ms or more continuously.		Stops (the mechanical controller operates independently).
(C5)	Short-circuit test corresponding error	DVD mechanism controller	While the power was on, the overcurrent detection port was at L for 40 ms or more continuously.		Turns off the power instantly (No indication on the FL display and no writing to flash memory)
C6	Child process stack overflow	DVD mechanism controller	The child stack overflowed.		Forcibly stop the unit with the mechanism controller, then reset with the system controller.

FL	Description of Error	Detecting Microcomputer	Causes if with a DVD	Causes if with a CD (LD)	Operation of the Unit
C7	SRAM error (checksum)	DVD mechanism controller	The checksum for the SRAM object data during Stop mode didn't match that during downloading.		The object data of the mechanism controller is reloaded.
C8	Mechanical controller runaway	DVD mechanism controller	Runaway of the mechanical controller was detected by the watchdog timer (105 mS).		The object data of the mechanism controller is reloaded.
CA	No-download error (download demand)	DVD mechanism controller	Downloading was demanded once the power was turned on.		Downloads the object data of the mechanism controller.
D1	SRAM device error	DVD mechanism controller	Reading from and writing to SRAM were impossible after the power was turned on.		No operation
D2	DSP device error	DVD mechanism controller	Reading from and writing to DSP were impossible after the power was turned on.		No operation
D3	LSI-II device error	DVD mechanism controller	Reading from and writing to LSI-II were impossible after the power was turned on.		No operation. In a case of a failure of the LSI-II, the error data may not be transmitted to the system controller.
E3	Violation against digital copy guard	System controller			Stop
F5	Tray being pushed	DVD mechanism controller	The Tray switch that had been Open mode was forcibly changed to a mode other than Open by an external force.		Closes
F8	Loading timeout	DVD mechanism controller	Loading, unloading or clamping could not be completed within a specified time (about 5 seconds).	(1) Loading, unloading or clamping could not be completed within a specified time. (2) Tilt error could not be canceled by reaching within the dead zone within 5 seconds.	Reverses the loading direction. If timeout is repeated upon retry, the unit stops.
FC	Focus	DVD mechanism controller	Focus could not be achieved when focus-in was tried and sweeping was done three times with a disc in the tray after disc-type sensing had been completed.	(1) A setup command was issued from the system controller with no disc loaded. (2) During setup, when the slider was moving to the startup position, the focus of an LD was out or focusing of a CD/ CDV did not succeed after three tries. (3) During startup, the maximum duty for the slider servo continued for three loops or more. (4) Focus of the LD was out during CAV/CLV sensing. (5) During TOC reading, the focus was out.	Stops wherever possible then opens (stops in the case of side B).
FE	TOC read	DVD mechanism controller		The entire TOC could not be read within 30 seconds after the first subcode was read.	CD: Stops (TOC read timeout), LD: Operates as if there were no TOC.

4. IC INFORMATION

• The information shown in the list is basic information and may not correspond exactly to that shown in the schematic diagrams.

●List of IC

LA9701M, LC78651W, CXD1854Q*, MC44724A*

* : Not used for DV-515.

● Pin Function

No.	Pin Name	I/O	Function
1	EFMOUT	O	Output the state that was binary-stated value EFM
2	C2F	O	C2 flag output
3	ROMXA	O	CD-ROM data output
4	ROMCK	O	Shift clock output for CD-ROM data output
5	LRSY	O	L/R clock output for CD-ROM data output
6	PP3/SYNC	I/O	General-purpose port input/output / DVD sync. signal input
7	FBUSYB	O	Busy signal output of DSP process operation
8	XTALOUT	O	External system clock output
9	FSX	O	CD 1 frame sync. signal output
10	SBCK	I	Subcode reading out clock input
11	SFSY	O	Frame sync. signal output of subcode
12	PW	O	Subcode P, Q, R, S, T, U, V and W output
13	VSS	–	GND for oscillation circuit
14	XIN	I	Connect a crystal resonator (16.9344MHz)
15	XOUT	O	Connect a crystal resonator
16	DVDD1	–	3.3V power supply of the oscillation circuit
17	EMPH	O	Monitor the deemphasis
18	SBSY	O	Sync. signal output of the subcode block
19	DOUT	O	Audio EIAJ data output
20	EFLG	O	Error correction state monitor of the error correction C1 and C2
21	FSEQ	O	Detection monitor of the CD/DVD frame sync. signal
22	FAST	O	Playback speed monitor
23	V_PB	O	Monitor output of the rough servo/CLV control
24	DRF	O	In focus monitor
25	TEST3	I	Test input 3
26	TES	I	Tracking error signal input
27	TEST2	I	Test input 2
28	JITT	I	Jitter quantity detecting signal input of EFM PLL
29	TILTE	I	Tilt error signal input
30	RF_PH	I	RF peak hold signal input
31	RF_BH	I	RF bottom hold signal input
32	TE	I	Tracking error signal input
33	FE	I	Focus error signal input
34	SLCIST1	–	Current setting pin 1 of the constant current charge pump for SLC
35	SLCIST2	–	Current setting pin 2 of the constant current charge pump for SLC
36	SLCO1	–	Control output 1 for SLC
37	SLCO2	–	Control output 2 for SLC
38	TEST1	I	Test input 1
39	EFMIN	I	EFM/EFM + input
40	AVDD	–	5V power supply of A/D and D/A for servo
41	AVSS	–	GND of A/D and D/A for servo
42	AUXO	O	DA auxiliary output
43	TILTDO	O	Tilt control signal output
44	TBAL	O	Tracking balance control signal output
45	SLDO	O	Sled control signal output
46	SPDO	O	Spindle control signal output
47	FDO	O	Focus control signal output
48	TDO	O	Tracking control signal output
49	VREF	–	Reference level of D/A for servo
50	TEST4	I	Test input 4

No.	Pin Name	I/O	Pin Function
51	HFLIO	I/O	Mirror detection signal input/output
52	LASER	O	Output pin for laser ON/OFF control
53	PP0/DVD_CDB	I/O	General-purpose port input/output / Disc discrimination signal output
54	PP1/CRCERRB	I/O	General-purpose port input/output / Subcode CRC result signal output
55	FG	I	FG counter input
56	PP2/EVENT	I/O	General-purpose port input/output / Event counter input
57	RESB	I	Reset input
58	CSB	I	Chip select input
59	RDB	I	Internal state reading signal input
60	WRB	I	Command / data writing signal input
61	DVDD2	–	5V power supply
62	VSS	–	GND
63	P0	I/O	Command / data input/output
64	P1		
65	P2		
66	P3		
67	P4		
68	P5		
69	P6		
70	P7		
71	VSS	–	GND
72	DVDD1	–	3.3V power supply for internal
73	BUSYB	O	Busy signal output of command process
74	SQOUT	O	Serial output of subcode Q
75	CQCKB	I	Shift clock input for subcode Q data output
76	RWC	I	Update permission input of subcode Q
77	WRQ	O	Read out ready monitor of subcode Q
78	AVSS	–	PLL GND for internal system clock
79	VRPFR	–	VCO oscillation range setting of PLL for internal system clock
80	VCOC	–	Connect a PLL filter for internal system clock
81	VPDO		
82	AVDD	–	PLL 5V power supply for internal system clock
83	PDO1	–	PLL filter connection pin 1 for EFM playback
84	PDO2	–	PLL filter connection pin 2 for EFM playback
85	PDO3	–	PLL filter connection pin 3 for EFM playback
86	AVSS	–	PLL GND for EFM playback
87	PCKIST1	–	Current setting 1 of PLL constant current charge pump for EFM playback
88	PCKIST2	–	Current setting 2 of PLL constant current charge pump for EFM playback
89	AVDD	–	PLL 5V power supply for EFM playback
90	DVDFR	–	VCO oscillation range setting of PLL for EFM playback 1
91	CDFR	–	VCO oscillation range setting of PLL for EFM playback 2
92	JV	O	Jitter output of PLL clock for EFM playback
93	PCK	O	Bit clock output for EFM playback
94	NCP0	–	NC
95	NCP1		
96	NCP2		
97	NCP3		
98	DVDD2	–	5V power supply
99	VSS	–	GND
100	LEFM	O	Output the state that cut and out a signal which was binary-stated value EFM with PCK

● Pin Function

No.	Pin Name	I/O	Pin Function	No.	Pin Name	I/O	Pin Function
1	VSS0	–	GND	51	RO0	O	[LSB]
2	BI7	I	[MSB]	52	RO1		
3	BI6			53	RO2		
4	BI5			54	RO3		
5	BI4		Connect to GND or B signal input	55	RO4		Cb/Cr (chroma) signal output or R signal output
6	BI3			56	RO5		
7	BI2			57	RO6		
8	BI1			58	RO7		[MSB]
9	BI0		Connect to GND or B signal input [LSB], or 27 MHz clock input	59	VDD2	–	GND
10	VSS1	–	GND	60	GO0	O	[LSB]
11	GI7	I	[MSB]	61	GO1		
12	GI6			62	GO2		
13	GI5			63	GO3		
14	GI4			64	GO4		Y (luminance) signal output or G signal output
15	GI3		Y (luminance) signal input or G signal input	65	GO5		
16	GI2			66	GO6		
17	GI1			67	GO7		[MSB]
18	GI0		[LSB]	68	VDD3	–	Power supply
19	VSS2	–	GND	69	BO0	O	[LSB]
20	RI7	I	[MSB]	70	BO1		
21	RI6			71	BO2		
22	RI5			72	BO3		
23	RI4			73	BO4		Open or B signal output
24	RI3		Cb/Cr (chroma) signal input or R signal input	74	BO5		
25	RI2			75	BO6		
26	RI1			76	BO7		[MSB]
27	RI0		[LSB]	77	VSS5	–	GND
28	VDD0	–	Power supply	78	HSYNCO	O	Horizontal sync. signal output
29	XCS	I	Chip select input for microcomputer interface	79	VSYNCO	O	Vertical sync. signal output
30	XSCK	I	Serial clock input for microcomputer interface	80	CBLNKO	O	Composite blanking signal output
31	SDI	I	Serial data input for microcomputer interface	81	CSYNCO	O	Composite sync. signal output
32	SDO	O	Output for test	82	HAPGAIN0	I	Effect level control input of outline emphasis
33	SXP_COM	I	Input for serial/parallel (H/L) switch of microcomputer communication	83	HAPGAIN1		
34	BLCKNR0	I	Input for effect level control of Block NR	84	TEST	I	Test pin (Pull Down)
35	BLCKNR1			85	TEN	I	Test pin (Pull Up)
36	BLCKSIZE	I	Input for block size switch of Block NR (L: 16 pixel, H: 8 pixel)	86	HAPBPF0	I	Input for correct bandpass control of outline effect
37	VDD1	–	Power supply	87	IFSEL1	I	Y/C and RGB input/output switching signal (L:Y/C, H: RGB)
38	BLCKST0	I	Input for block border position control of Block NR	88	HAPBPF1	I	Input for correct bandpass control of outline effect
39	BLCKST1			89	NRON	I	ON/OFF switching signal of field NR (L:OFF,H:ON)
40	BLCKST2			90	LEVEL0	I	Effect level switching signal of field NR (4-stage)
41	VSS3	–	GND	91	LEVEL1		
42	BLCKST3	I	Input for block border position control of Block NR	92	FNR_UFRZ	I	Input for stick improvement process switch of field NR (L: OFF, H: ON)
43	CORON	I	Input for core-ring control of outline emphasis (L: OFF, H: ON)	93	XRST	I	Reset pin (Pull Up)
44	ADVD	–	Power supply for DRAM (5V)	94	VSS6	–	GND
45	ADVS	–	GND for DRAM	95	CSYNCI	I	Composite sync. signal input
46	NC	–	NC	96	CBLNKI	I	Composite blanking signal input
47	NC			97	VSYNCI	I	Vertical sync. signal input
48	NC			98	HSYNCI	I	Horizontal sync. signal input
49	NC			99	VDD4	–	Power supply
50	VSS4	–	GND	100	DCLKI	I	DOT CLOCK input (13.5 MHz)

● Pin Function

No.	Pin Name	I/O	Function
1	CVBS/Cb/B1	O	Analog composite video signal output or Cb or B signal output current drive (positive)
2	$\overline{\text{CVBS/Cb/B1}}$	O	Analog composite video signal output or Cb or B signal output current drive (negative)
3	CVBS/Cb/B1 Vdd	–	Power supply for CVBS / Cb / B DAC1 circuit
4	Y/G1	O	Analog luminance or G signal output current drive (positive)
5	$\overline{\text{Y/G1}}$	O	Analog luminance or G signal output current drive (negative)
6	Y/G1 Vdd	–	Power supply for Y / G DAC1 circuit
7	C/Cr/R1	O	Analog chrominance signal output or Cr or R signal output current drive (positive)
8	$\overline{\text{C/Cr/R1}}$	O	Analog chrominance signal output or Cr or R signal output current drive (negative)
9	C/Cr/R1 Vdd	–	Power supply for C / Cr / R DAC1 circuit
10	DAVss	–	Ground for DAC circuit
11	Ibias 1	O	Reference current for the 1st set of 3 DACs
12	Vref 1	–	Reference full scale voltage for the 1st set of 3 DACs
13	DAVdd	–	Power supply for the DACs
14	Vref 2	–	Reference full scale voltage for the 2nd set of 3 DACs
15	Ibias 2	O	Reference current for the 2nd set of 3 DACs
16	NC	–	Non connection
17	CVBS/Cb/B2	O	Analog composite video signal output or Cb or B signal output current drive (positive)
18	$\overline{\text{CVBS/Cb/B2}}$	O	Analog composite video signal output or Cb or B signal output current drive (negative)
19	CVBS/Cb/B2 Vdd	–	Power supply for CVBS / Cb / B DAC2 circuit
20	Y/G2	O	Analog luminance or G signal output current drive (positive)
21	$\overline{\text{Y/G2}}$	O	Analog luminance or G signal output current drive (negative)
22	Y/G2 Vdd	–	Power supply for Y / G DAC2 circuit
23	C/Cr/R2	O	Analog chrominance signal output or Cr or R signal output current drive (positive)
24	$\overline{\text{C/Cr/R2}}$	O	Analog chrominance signal output or Cr or R signal output current drive (negative)
25	C/Cr/R2 Vdd	–	Power supply for C / Cr / R DAC2 circuit
26	ChipA	–	I2C chip address select (0:40 (hex) / 41 (hex) 1:1D (hex) / 1E (hex))
27	TEST	I	TEST pin (Grounded)
28	DVss	–	Ground for Digital circuit
29	CLOCK	I	27MHz clock input
30	DVdd	–	Power supply for Digital circuit
31	$\overline{\text{Reset}}$	I	Reset signal, active LOW
32	PAL/$\overline{\text{NTSC}}$	I	NTSC/PAL select This pin is sampled only at Reset.(NTSC: Low, PAL: High)
33	SO	O	In SPI mode, serial data output / In I2C mode, Grounded
34	SDA/SI	I/O	Serial data input Open drain output / If SPI mode, serial data input
35	SCL/SCK	I	Serial clock
36	SEL	I	Connect to Ground / If SPI mode, this pin is chip select.
37	DVdd	–	Power supply for Digital circuit
38	DVss	–	Ground for Digital circuit
39 to 46	DVIA7 to DVIA0	I/O	8-bit Multiplexed 4:2:2 data (ITU Rec656/601) input (DVIA), or Multiplexed Y data (ITU Rec656/601) input in 16-bit input mode
47	Vmute	I	Video mute on Reset (0: normal, 1: mute)
48	C/Fsync/VBI	I/O	Csync / Frame sync output, or external VBI information input
49	F/Vsync	I/O	Frame sync or Vertical sync input/output
50	Hsync	I/O	Horizontal sync input/output
51	A/B sel	I	Switch control for 8-bit X2 Multiplexed 4:2:2 data (ITU Rec656/601) input (DVIA) or (DVIB)
52 to 55	DVIB7 to DVIB4	I/O	8-bit Multiplexed 4:2:2 data (ITU Rec656/601) input (DVIB), or Multiplexed Cr/Cb data (ITU Rec656/601) input in 16-bit input mode
56	DVss	–	Ground for Digital circuit
57	DVdd	–	Power supply for Digital circuit
58 to 61	DVIB3 to DVIB0	I/O	Multiplexed 4:2:2 data (ITU Rec656/601) input (DVIB), or Multiplexed Cr/Cb data (ITU Rec656/601) input in 16-bit input mode
62	TP	I/O	Test data input/output (Grounded)
63 to 64	NC	–	Non connection (Grounded)
